- Django and Django Rest framework
- Express and Nodejs API
- Git and GitHub
- MySQL and MongoDB Database
- Nodejs API
- Can work in a SCRUM environment
- Docker (BASIC)
- React
- Linux and vim knowledge

WORK EXPERIENCE

Beyul Venture

JUL 2021 - SEP 2021

- A website that is similar to a travel agency.
- Created Backend REST API using Django REST Framework
- MVC pattern was used.
- Added concepts like pagination and set API limits
- Used Redis to optimize the response latency.

Digital Billing

JUL 2021 - SEP 2021

- An online inventory management system.
- Keep track of all billing records and they can also be in printable format.
- Have different admin and farm dashboards where the admin can view all the activity logs.
- Change the password using the email link.
- Used Django Jazmin for the admin template and a custom template with bootstrap for the farm dashboard.
